| ⑭ Japanese Hill Garden      | ㉘ Pump House               |                            |

③ *Out on a Limb*: At more than forty feet off the ground, you can scramble like a squirrel and appreciate the birds-eye view of the forest floor.

⑩ Oak Allée: This tree-lined walkway is a great place to learn about root growth and functions.

⑪ The Springhouse: Just what is a springhouse? Visit this area to find out and, while you're there, check nature's temperature.

⑮ The Log Cabin: One of Lydia Morris's favorite retreats, the rustic log cabin reminds us that trees make good homes for both people and animals.

⑯ The Dawn Redwoods: This grove of majestic trees exists today because of plant explorers. Learn how these trees were once lost but then found again.
